Muhammad Faraz Memon

Software Engineer | Python Developer | AI/ML Enthusiast

PROFILE

Software Engineering graduate with hands-on project experience in Python development, Android application development, machine learning fundamentals, computer vision, and AI-powered tools. Builds practical applications using Python, Kotlin, Flask, OpenCV, scikit-learn, and Jetpack Compose. Interested in software engineering, A/ML, and building user-focused products.

EXPERIENCE

Datheon — Forward Deployed Engineer (FDE) Intern/Trainee
Oct 2026-Present
Project-based learning and practical engineering experience.

Datheon — Machine Learning & Data Science Intern
Oct 2026 - Oct 2026
Project work: Iris Classification; Real Estate House Price Prediction.

DecodeLabs — AI Intern/Trainee
Oct 2026-Nov 2026
Project work: Rule-Based AI Chatbot & more

CodeAlpha — Application Development Intern/Trainee
Oct 2026- Present
Project work: Flashcard Quiz App; Language Learning App; Random Quote Generator.

Oasis Infobyte — Artifical Intelligence (AI) Intern
Oct 2026–Present

Craft 4 Dev — Python & AI Developer Intern
Jan 2026–Jun 2026

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, basic HTML, CSS, JavaScript

AI/ML & Computer Vision: machine learning fundamentals, scikit-learn, OpenCV, DeepFace

Frameworks & Tools: Flask, Tkinter, Android, Jetpack Compose, Room, basic Firebase

Other: APIs, SpeechRecognition, pyttsx3, Whisper, SMTP, OpenWeather API, Pyperclip, Git, OOP, DSA fundamentals, debugging, testing, problem solving

EDUCATION

- BS Software Engineering — Iqra University, Karachi
- HSSC — Govt. Islamia College, Sukkur
- Secondary School — Public School, Sukkur

CORE SKILLS

- Python
- Kotlin
- Java
- Flask
- Android Development
- Machine Learning
- Deep Learning
- OpenCV
- DeepFace
- Firebase
- SQL
- HTML, CSS, JavaScript
- Git
- Problem Solving
- Data Structures & Algorithms
- OOP
- Communication
- Teamwork

EDUCATION

BS in Information Technology
Mehran University of Engineering & Technology
2019 – 2026

INTERESTS

- Coding
- AI & Machine Learning
- Mobile App Development
- Reading Tech Blogs
- Problem Solving

SELECTED PROJECTS

1. **Modify (Final-Year Project)**
   Emotion-based music generation application built with a Kotlin Android app, Python Flask, OpenCV, DeepFace, and Firebase.
2. **AI-Powered Frontend Generator**
   Python and Flask project for generating frontend interfaces.
3. **Iris Classification**
   Machine-learning classification project using Logistic Regression; accuracy approximately 93.33%.
4. **Real Estate House Price Prediction**
   Machine-learning regression project.
5. **Flashcard Quiz App**
   Android application.
6. **Language Learning App**
   Android application supporting multiple languages.
7. **Rule-Based AI Chatbot**
   Python project.
8. **Mac Voice Assistant**
   Python project using Whisper, SpeechRecognition, and pytsx3.

ADDITIONAL PROJECTS

- Python Code Assistant
- Random Password Generator
- BMI Calculator
- Mobile Shop Management System
- Python automation utilities
- Java desktop applications

PROJECT TECHNOLOGIES

Python, Kotlin, Flask, OpenCV, DeepFace, Firebase, Android, Whisper, SpeechRecognition, pytsx3, scikit-learn, Logistic Regression
